BEYOND AUTOMATION

We are looking for a dedicated personality with a passion for automation technology for our location in Houston, Texas! Our team is characterized by motivated employees who maintain a fair, transparent and appreciative cooperation. As a family business, it is important to us that our colleagues feel comfortable and that communication takes place at eye level. Founded and located in Bitburg, Germany, PETRØN1K is a specialist in measurement and control systems and has been at home all over the world since 1986. Become part of a future-oriented and innovative company and develop the entire engineering of measuring and control systems with us in different areas of automation technology in a highly professional environment. We are looking for employees who fit in with us and our corporate culture, who share our passion for automation technology and who enrich our team with their personality.

CØNTRØLS & AUTØMATIØN ENGINEER M/F/D

PETRØN1K Automation Inc. // Houston, Texas // USA

Your challenge

Development and commissioning of automation solutions for the process industry worldwide // PLC programming based on a wide variety of software platforms // Development of customized individual solutions // Creation of visualization systems // Creation of functional descriptions for the entire system // Documentation of the development process // Coordination of the commissioning activities on site, with internal resources, other contractors, partners and customers // Identify and resolve deviations on site // Develop site reports of commissioning activities

Your qualification

Bachelor's or Master's degree in electrical engineering with a focus in automation technology // Knowledge of programming programmable logic controllers and visualization systems // Experience in the use of industrial bus systems // Flexibility in the solution development // Willingness to travel about 25-50% internationally // Team spirit

What we provide

Permanent employment // 20 vacation days // Flexible working hours // Working from home possible // Attractive base salary // Christmas bonus // 401-K Plan contribution // Health, dental, and vision insurance // Challenging and varying tasks in ambitious projects // Support of professional development // Open, constructive and trusting atmosphere and flat hierarchies // Short and fast communication ways // Open feedback culture // Room for ideas and co-creation // Team-oriented and innovative corporate culture // Health management // Team events
